

Your Plastics Recycling Partner

Elkem Silicones is a dedicated partner in the plastics recycling industry. Elkem Silicones serves the recycling industry with high performance products that have demonstrated performance benefits during the wash and separation processes. Our technical services team are at your disposal to provide you with products and services that improve your plant's productivity.

Silcolapse® 623 & Silcolapse® 723: 30% Silicone Antifoams Emulsion

Silcolapse® 623 and 723 are antifoams/defoamers designed to be used in a wide range of aqueous industrial applications like plastics recycling processes. Providing superior antifoam and defoaming properties in caustic wash systems.

Bluesil™ Clean 101 & Bluesil™ Clean 102: Cleaning Formulation for Plastic Washing

Bluesil™ Clean 101 and 102 are functional cleaning formulations for PET and PE (HDPE & LDPE) in the washing process, providing a low foaming, superior cleaning formula for caustic wash systems.

Bluesil™ SP 3300 & Bluesil™ SP3304: Separation Aids

Bluesil™ SP 3300 and SP 3304 are unique, high performance silicone based polymers that provide wetting properties and produce low surface tension. These properties allow superior plastic separation at low use levels in float/separation process.
